### 12V QWIK-FILL On Board Battery Watering System

Marine lead acid batteries require periodic watering. Now, for the first time, battery water levels can be safely, conveniently and accurately maintained, using the new, patented Qwik-Fill On-Board Watering System. Even batteries that may be tucked away in hard to reach area below deck can be remotely topped off; there is no need to remove individual cell caps or even get near the batteries. Qwik-Fill installs in less than 5 minutes, fits most group size 24 through 31 batteries, and allows several batteries to be filled simultaneously through one fill-point. Imagine being able to fill your batteries while you are standing on deck or beside your boat! It's now possible with the new Qwik-Fill On-Board Battery Watering System.

#### Features-

- Safe, easy, fast and accurate way to add water to your battery.
- Automatic Water Level and shut off
- Safe remote watering, no acid hazard
- Simple to install
