

## **AQUA LANTERN - Solar Light Buoy**

**100% Satisfaction Guarantee!**  
**Price Includes Free Shipping**

**Product Information:** The Aqua Lantern Solar Lighted Buoy is a highly visible, 20" marker buoy by day that illuminates at night. It uses a watertight solar generator during daylight hours to charge 4, 1.2V rechargeable batteries that power 5 super bright LED's (Light Emitting Diodes). The Batteries can be recharged 500 times before they need to be replaced. The 5 LED's have a life span of 100,000 hours. The unique bell shape design keeps the buoy vertical in the water. It is rotationally molded with durable High Density Polyethylene. The photocell in the solar panel automatically turns the lights on when the sun sets and turns the lights off when the sun rises.

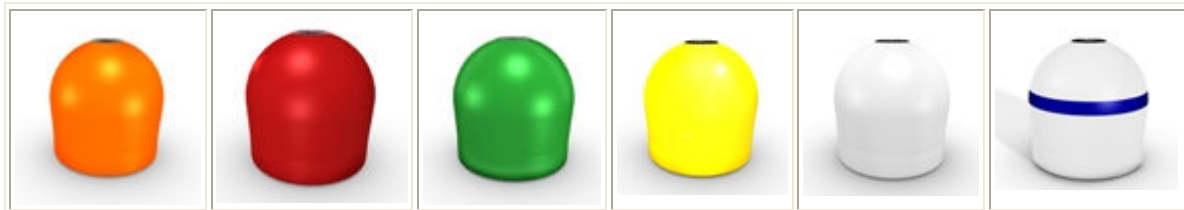

The Aqua Lantern promotes safe boating at night and reduces the chance of damage to personal property. Protect your floating swim platform, floating trampoline, pier, dock, PWC and swim areas. Help your fellow boaters navigate the lake safely at night, while adding a fun decorative touch to a lake or waterway.

### **Advantages**

- Rechargeable Batteries last for 2 years
- LED's last for 100,000 hours or 20 years
- Highly visible in daytime
